MP3 Bible Study on the Go

Tuesday, February 1, 2022

This is part of my grammar studies and grammar project: I am not religious, at least as is typically meant by the words religion and religious.

I have been asked to share my work, the focal point of which is called Universal Language which can be found on the Archive.

Many claim to believe in, and many claim to disbelieve in, the Bible: These two groups of people have at least one of two things in common: 1, they have never read it, in part or in whole, and 2 they are unaware, or disbelieve, the most important messages of the Bible.

What are the most important messages of the Bible?

1) It is aimed at the entire world, that one day all of humanity will have one standard for human behavior, thus, there is a standard for human psychology.

2) The key to attaining to this standard of human psychology is a very provable fact, the definition of mind and the only way information can be processed in truth.

In several places of the Bible, it tells the reader that it is sealed to man's understanding until after a certain point in human history, a point when the mind of man is mature enough to learn what a pure language is. I have been asked, but not by anyone human, to share my work, a work based on biological fact: Psychology is commensurate with the principles of Language which are functionally resident in the mind as grammar systems.

Now, where does this lead? What is Language and how does language become grammar systems? Language is Universal and Intelligible. Grammar is Particular and Perceptible.

One of the man made items which is prevalent in this time in human history which offers a good example as to what Language is, and its Universality, is the computer. Have you ever considered that the computer not only processes all information using simple binary recursion, but all of its products, machine control, visual displays, sound, are all products of simple binary recursion.

The Bible puts this fact into many metaphors. The most blatant is the story of Adam and Eve when put into a simple sentence: *Adam and Eve are a Conjugate Binary Pair*, *whereby Complete Induction and Deduction produces the human race*.

The definition of a thing is a relative constrained by correlatives; this is a binary definition.

Binary recursion affords the ability to construct exactly four categories of grammar from the universal concept of binary: Common Grammar, Arithmetic, Algebra and Geometry. This is the intelligible matrix by which man is born which mankind must pass through just like everyone had to pass through the perceptible matrix of their mother, i.e. this is what is meant by being born again. Even a man, male or female, must pass through this binary construct in order to become a functional human being.

Today there is not, as the Bible notes, and what the computer proves, mankind has not yet even constructed a correct grammar book, nor stressed binary recursion, for humanity, as a biological imperative for survival.

As I said, I was asked to help change this abominable condition of man.

A mind is the most powerful life support system of any form of life possible when it is functional. Thus, a mind has a well-defined biologically determined job to perform, and well-defined physically determined means

of doing its own work, the work, it is written, the purpose for which man is being made, to tend the garden of life, the Garden of God.

In metaphor, and in fact, the message is not only one and the same, it is wholly undeniable.
